9/26/72 The returned-herewith ltr from the American Committee on Africa does have the value of eliminating error in my recollection of Ned's group's name. It ain't this! Not with some of those names, despite Norman Thmaas' involvement in another CIA thing. JNS is a friend of PH's. Some of his perceptions are pretty sharp. He tunrs on and off like a firefly bud had shortly before this offered to do some library work, at which he is good. Nothing else new on this. Nor any res]onse from Gary on that or anything else. Thanks, HW
